

# HOW TO MAKE A COLLAGE POPPY

you will need:

- blank paper
- scissors
- a glue stick
- a pencil
- scrap paper / junk mail / old magazines and newspapers

## step 1

draw a simple outline of a poppy,

begin with a small circle,

then two round petals - the bottom one should be slightly bigger,

and add a leaf on one side.

## step 2

start cutting out sections of colour from your old magazines

## step 3

for a poppy you will need lots of red and some green and black

## step 4

you might need to trim down some large pieces

## step 5

start sticking down your bits of paper, begin with green on the leaf

Don't worry about your bits of paper not being 'solid' colours, different patterns will add texture to your poppy.

### step 6

next is red for the petals

### step 7

carefully place squares along your drawn out line

### step 8

keep going by sticking different pieces on top of each other to fill the petals

### step 9

finish off with black in the poppy centre

And you are done ! Collage is an easy and fun way to create colourful and eye catching pictures.
